HOW TO PLAY

Your LED badge represents your universe. You must always wear it proudly.

There are four alternate universes. Start in one and deliver a package to another, using certain storefronts as gates from one world to the next.

You can earn a reward for delivering certain packages, but only if the package arrives unharmed!

Look for gatekeepers in your universe, with the same-colored badge as you. Gatekeepers can pass you through to another universe and give you a new LED badge.

You can only talk to players and gatekeepers in your own universe: red-to-red, green-to-green, etc. All other players and gatekeepers are invisible to you.

Lastly, look out for chasers! They're wearing glowing colored wire, and will steal your delivery if they tag you.
